

HYDRAULIC BOOM ADJUSTMENT

An integrated hydraulic jack system makes changing the boom height effortless. The system was designed to make boom adjustment easier. Now, simply pump the jack handle to raise the boom and release to lower it.

- * Upgrade kit available (some drilling required).
Part no: PLU-200

SINGLE ARM SYSTEM

Better access and easier operation. The arm is now hanging from one side only, which makes it possible to reach in to hard areas. The bearing mounted arm includes a brake assembly for locking the head in any desired position.

- * Upgrade kit available.
Part no: PLU-215

SHORTENED A-FRAME

New designed A-frame allows legs to be 21" (533mm) shorter.

- *Makes the handling and transportation of the welder unit so much easier.
- *New design prevents interference with frame racks, technician's feet, etc.
- *The foot print of the PR-10 was cut in half.
- *Upgrade kit available. Easy to convert old style to new style.

Part no:P10-04

PNEUMATIC ELECTRODE DRESSER KIT

- * Keeps welding electrodes clean
- * Maintains 6mm weld nugget
- * Convenient, easily accessible storage

Kit comes complete with:

- *PLT-26S Electrode dresser
- *PLT-26X Drill Motor
- *PLU-05B Drill Holder
- *H-05 Whip Hose
- *F-25 T-fitting

Part no: PLU-100

ELECTRODE TOOL TRAY and TOWER PULL HANDLE (see page 2)

BIGGER CASTERS - 5"

A set of four, 5," hard rubber casters, for those difficult work area floors. These bigger casters make it easier to maneuver and fit on all welder bases. Two casters are equipped with brakes.

**Part no: P10-045
P10-045B - with brake**

P10-45: Handle Bar Assembly

P10-46: Pull handle/Tool tray Assembly

P10-42: Welding head storage hook
